Help: Execution Logs

Execution logs of all the data sources in a project are shown in this page. Execution logs are derived from the running instances of data sources which may include records from unccessful and successful executions.

Following details can be found on this page:-

1. List of all the executed jobs in all the data sources.
2. The number of records proicessed, job type and execution messages from the system.
4. Time taken to compelte the execution
5. you can also stop the ongoing execution.

For more details on execution logs in IIP please visit the url below
